

Assignment 7

GoodLuck Page No.

Date

Name - Ganesh Suresh Kandepalli

class - SE IV

Roll NO - 21430

Batch - F4

D.O.S - 8/4/2021

Assignment Name - Waste Management during lockdown.

Assignment NO - 7

Details -

This is report on waste management during lockdown. How the waste in the house was treated and dumped by me is discussed in the report.

Methods -

First of all, I segregated the dry waste and wet waste in two different dustbins. All the plastic waste, metal waste, wooden waste, dust and dirt in the house were dumped into dry waste dustbin. All the food remains, peelings of vegetables and fruits were dumped into the wet waste management dustbin.

The door to door waste collector vehicle used to come everyday. They too had the provision of separating dry and wet waste. All the society members wore masks while coming to dump their waste.

All of them one by one dumped their waste maintaining Social distancing.

Learnings-

I learnt about how to segregate dry and wet waste. I also learnt how to dump waste in waste collections vehicles by following covid-19 protocols.

Conclusion:-

We should manage waste management properly so as to maintain cleanliness in our home as well as in the Society. This leads to a cleaner and healthier nation.
